

Performance Testing Report

Date: 1 July 2026	Team ID XXXXX
Project Name: AdForge AI: AI-Powered Advertisement Copy Generator	Name: Rudra Shekhawat

Performance testing is critical to ensure your solution is fast, scalable, and stable under specific workloads. Documenting your testing strategy, tools utilized, and metrics measured.

Step 1: Test Scenarios & Tooling

S.No	Test Type	Scenario / API Endpoint Tested	Tool(s) Used
1	Load Testing	Simulating 500 concurrent users generating ad copy.	Apache JMeter, Postman
2	Stress Testing	Pushing the database with rapid, high-volume requests.	Apache JMeter
3	Spike Testing	Sudden burst of traffic on the generation endpoint.	Apache JMeter
4	Endurance Testing	Running average load for 12 hours to check memory leaks.	Apache JMeter

Step 2: Key Performance Indicators (KPIs) & Results

S.No	Metric (KPI)	Target Threshold	Actual Result	Status
1	Average Response Time	< 3000 ms	2450 ms	Pass
2	Peak Response Time	< 5000 ms	4100 ms	Pass
3	Throughput (Requests/sec)	> 100 RPS	120 RPS	Pass
4	Error Rate	< 1%	0.5%	Pass
5	CPU/Memory Utilization	< 80% under load	65%	Pass
