

Project Proposal (Proposed Solution) Report

Date: 1 July 2026	Team ID: XXXX
Project Title: AdForge AI: AI-Powered Advertisement Copy Generator	Name: Rudra Shekhawat

This proposal aims to transform advertisement copywriting by leveraging AI, boosting efficiency and creativity. It tackles manual content creation challenges, promising faster operations, improved engagement, and enhanced ROI.

Project Overview

Section	Details
Objective	Revolutionize the ad copy process by implementing AI techniques, ensuring faster and more creative output.
Scope	The project assesses and enhances the ad creation process, incorporating AI for a more efficient and versatile system.

Problem Statement

Section	Details
Description	Addressing inefficiencies and the high time consumption involved in manual ad copywriting, which affects operational efficiency.
Impact	Solving these issues will result in improved marketing output, reduced time-to-market, and an enhancement in campaign conversion rates.

Proposed Solution

Section	Details
Approach	Employing AI-driven language models to analyze requirements and generate high-converting, tailored ad copies dynamically.
Key Features	- Machine learning-based content generation. - Real-time adaptability for different platforms. - Continuous learning to suit evolving market trends.

Resource Requirements

Category	Resource Type	Description	Specification
Hardware	Computing Resources	CPU/GPU	Standard Cloud Compute
Hardware	Memory	RAM	8 GB
Hardware	Storage	Disk Space	500 GB SSD
Software	Frameworks	Backend	Flask

Software	Libraries	AI/ML	Groq API, requests
Software	Env	IDE	VS Code
Data	Dataset	Source	User-provided briefs
